What types of ingredients do you use in your recipes?

TOP FEATURES

1

PRESERVA® FOOD CARE SYSTEM

Dual evaporators, a produce preserver and an air filter work together to enhance food preservation and minimize odors. Dual evaporators provide a dedicated refrigeration and freezer unit to help keep food fresh longer. A produce preserver absorbs ethylene gas to delay over-ripening(1). And the air filter reduces common food odors.

2

AUTOMATIC ICE MAKER

Ensures that customers have a constant supply of ice for entertaining. The ice maker connects to the refrigerator with a water line.

3

PLATINUM COLORED INTERIOR WITH METALLIC TRIM

Platinum Colored Interior brings premium style inside the refrigerator to complement the quality ingredients cooks keep on hand. Industry first platinum-color interior sleek silver walls accented by metallic trim on shelves, drawers and door bins offer a step up from the standard white interior.

DID YOU KNOW?

Sequential dual evaporators change the way air flows through the refrigerator and the freezer. This is a key component to extending the life of fresh and frozen ingredients, particularly produce.

HOW TO DEMONSTRATE

PRESERVA® FOOD CARE SYSTEM

Show off the vents or baffles between the sections and discuss with customers how the air is exchanged between fresh and frozen to keep temperatures level.
