What types of ingredients do you use in your recipes?

TOP FEATURES

1

PRESERVA® FOOD CARE SYSTEM

Dual evaporators, a produce preserver and an air filter work together to enhance food preservation and minimize odors. Dual evaporators provide a dedicated refrigeration and freezer unit to help keep food fresh longer. A produce preserver absorbs ethylene gas to delay over-ripening(1). And the air filter reduces common food odors.

2

IN-DOOR-ICE® SYSTEM

Adds interior room in the freezer with an ice system that mounts on the inside door, allowing for extra freezer shelf space.

3

LED LIGHTING

Illuminates the inside of the refrigerator and freezer, providing better visibility. Unlike incandescent bulbs, LED lights use less energy, last longer and require little maintenance.

DID YOU KNOW?

Sequential dual evaporators change the way air flows through the refrigerator and the freezer. This is a key component to extending the life of fresh and frozen ingredients, particularly produce.

HOW TO DEMONSTRATE

PRESERVA® FOOD CARE SYSTEM

Show off the vents or baffles between the sections and discuss with customers how the air is exchanged between fresh and frozen to keep temperatures level.
