WED6150P

7.0 CU. FT. WHIRLPOOL® TOP LOAD
ELECTRIC DRYER WITH MOISTURE SENSOR

Dimensions: h: 43" w: 29" d: 28.375"

Colors: Volcano Black White

START THE CONVERSATION

How often have you pulled clothes out of your dryer that were either too wet or too dry?

TOP FEATURES

1

MOISTURE SENSING

Two sensors increase your dryer's ability to measure moisture and temperature, helping prevent overdrying by automatically stopping the cycle when the load is dry.

2

WRINKLE SHIELD™ OPTION

After the cycle ends, help keep wrinkles from setting into clean, dry fabrics with the Wrinkle Shield™ Option. It keeps clothes tumbling for up to 150 minutes after the cycle ends or until you open the door.

3

STEAM REFRESH CYCLE

Release wrinkles and reduce odors with the Steam Refresh Cycle. It uses water and heat to get clothes ready to wear without rewashing.

DID YOU KNOW? Moisture sensors are better at detecting dryness than thermostats, and they promptly end the cycle.

HOW TO DEMONSTRATE

MOISTURE SENSING

Have your customer open the dryer door. Point out the moisture sensing strips along the back wall of the interior of the dryer. Tell your customer that clothes brush up against the metal strips, detecting if there is still moisture in them. Once the dryer determines enough moisture has been removed, the cycle stops.
