REFRIGERATOR - 14 CU. FT.**

Dimensions: h: 62.875" w: 28" d: 32.125"

Colors:  Black  Monochromatic Stainless Steel

 White

START THE CONVERSATION

How much do you think you could save on energy bills with an upgraded refrigerator?

TOP FEATURES

1

ENERGY STAR® CERTIFIED

Experience maximum savings on utility costs with ENERGY STAR® certified refrigerators that reflect industry improvements in insulation and compressor technology to use less energy without sacrificing features.

2

FREEZER TEMPERATURE CONTROLS

Keep frozen items ice cold with controls that allow you to adjust the temperature level in the freezer compartment. Customers can enjoy colder ice cream or not over frozen veggies with a more controlled environment. Rather than allowing the freezer to just freeze, this gives the control back to the customer to make the freezer the way they want it.

3

OPTIONAL ICEMAKER

Don't worry about refilling ice trays when you have this optional icemaker installed.

DID YOU KNOW?

Refrigerators over 10 years old could cost about \$110 per year to run,(1) making ENERGY STAR® certified models more cost-efficient.
(1)EnergyStar.gov.

HOW TO DEMONSTRATE

ENERGY STAR® CERTIFIED

Show customers a 60-watt incandescent light bulb. Assure them that this refrigerator model will use less energy over a year than the light bulb. What a savings!
